

Serial No. 09/432,113

**REMARKS**

The Examiner requested that the claims would be allowed if amended so that all independent claims recite "continuous interactive movement" (e.g., claim 5, line 7) or "dragging" (e.g., claim 15, line 4) of an object (or designated area) so "that the moving designated area overlaps the first connector" (e.g., claim 5, lines 9-10). The claims have been amended in response to this request.

In the voicemail message left April 28, 2005, the Examiner stated that claims 10 and 12 needed to be amended because they lacked "interactive" movement. However, claim 10 recites "continuous Interactive two-dimensional movement input to determine when during the movement the movement overlaps the first connector" (claim 10, lines 6-7) and claim 12 recites "interactive continuous two-dimensional movement and when during the movement it is judged that the movement overlaps the first connector" (claim 12, lines 7-8). Therefore, claims 10 and 12 have not been amended.

If further amendment is required to place the application in condition for allowance, the Examiner is respectfully requested to contact the undersigned at the phone number below.

Respectfully submitted,

STAAS & HALSEY LLP
